# OPERATIONS SUMMARY

[www.burnerfire.com/contact](http://www.burnerfire.com/contact)

**1-800-864-4073**

**BURNER**

## WHO WE ARE

Incorporated in 1977, **BURNER FIRE CONTROL** is a 100% family-owned & second-generation Louisiana Corporation. Serving a variety of Onshore & Offshore markets, our Company has grown to be one of the most unique and capable service companies in the Gulf Coast.

As we deepen & expand our current relationships with long-term clients, we also approach new customers to present our experience & credentials to offer superior quality & service. Our mission is to assist leading organizations to elevate their safety profile by protecting & maintaining key assets while optimizing their operations.

## OTHER ITEMS OF NOTE

We are a Veteran-Owned Small Business (VOSB); Certified by the U.S. Small Business Administration (SBA)

We maintain ASME Accredited facilities to Manufacture & Repair Certified Equipment for Client Deliverables

We are an Elected Response Partner for both Emergency Deepwater Containment Consortiums in the Gulf of Mexico

We are ABS Certified to Inspect, Repair, and Maintain Fire, Gas, and Alarm Equipment on Offshore Facilities

We maintain Professional Affiliation with The Royal Institution of Naval Architects to promote Global Offshore & Marine Safety

We maintain NICET Level III Personnel for Special Hazards Suppression & Fire Alarm Systems

We are both a Specialized Fire Equipment Manufacturer and Authorized Distributor for leading Extinguishing & Gas Equipment

We maintain ISN Framework Membership to Deliver our Portfolio in a Safe and Reliable manner

We remain current with applicable Codes & Standards affecting Compliance, Specifications of Equipment, Performance, and Application in Hazardous Environments

# EQUIPMENT & SERVICE DELIVERY

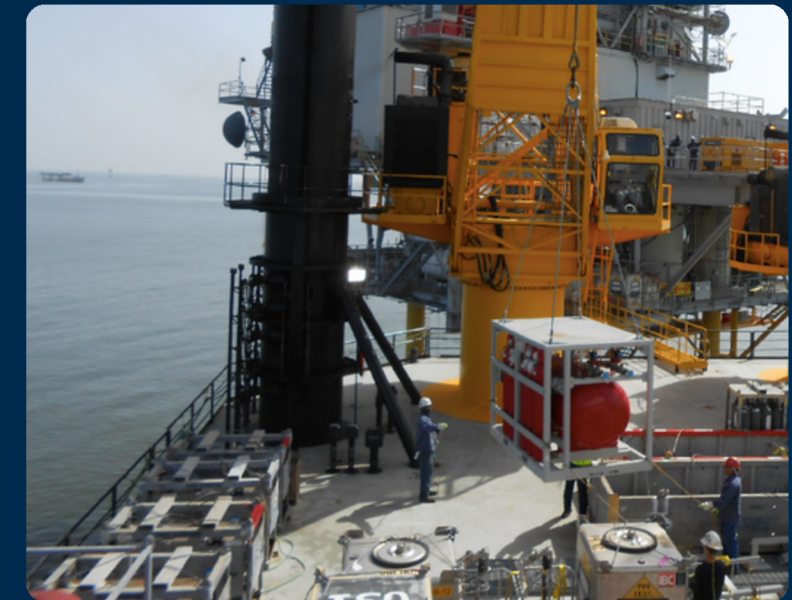

FIRE SAFETY / SPECIAL HAZARDS

FABRICATION, CONSTRUCTION,  
SAFETY MAINTENANCE

INDUSTRIAL SERVICES

ON/OFFSHORE PERSONNEL & PURPOSE-BUILT EQUIPMENT (INSTALLATION, INSPECTION, REPAIR, MAINTENANCE)

SHORE-BASE SUPPORT & CAPABILITIES (PROJECT MGMT, REPAIR & MAINTENANCE)

## FIRE SAFETY SERVICES

**ABS CERTIFICATION No. 23-5671691-A**

### **ABS Recognized Inspection, Repair, & Maintenance Services**

- Fixed Fire Extinguishing Systems
- Gas / CO2 Systems
- Pressurized Water Spraying & Water Mist Systems
- Foam Systems
- Automatic Sprinkler Systems
- Portable Fire Extinguishers
- Fire / Smoke Detection & Alarm System

### **ABS Certified Subcontractor Services**

- AirGas - Recharging & Hydrotesting CO2 and N2 Bottles
- Fire Foam Services - Foam Analysis

### **Special Hazards Services**

- Water Curtain® Heat Suppression Equipment & Services
- Methanol, Xylene Fire Protection Systems

### **Fire Safety Survey & Inspection Services for any Facility (Offshore & Land)**

- Hazard Identification (HAZID)
- Regulatory (USCG, BSEE)
- Compliance (DNV, ABS)
- Equipment (Fire, Safety, Life-Saving)

### **Fire & Gas System Design & Installation + IRM (Inspection, Repair, Maintenance)**

- Custom Dry Chemical & Foam Equipment (LNG, Heliport)
- Fire Water Pumps (Annual Testing, Flow Rate, Pump Performance)
- Navigational Aids
- Detection Systems, Alarm Systems
- CO2 & FM 200 Systems

### **Safety Equipment Supply & Inspection**

- Life Saving Equipment (Life Rafts, Personnel Nets, Vests, Buoys, First-Aid Kits, Eye-wash Stations, PPE)

WE ARE FACTORY TRAINED TO DESIGN, INSTALL,  
INSPECT, TROUBLESHOOT, REPAIR, & MAINTAIN  
FIRE & GAS EQUIPMENT FROM A VARIETY OF  
MANUFACTURERS

**Dräger**

**MSA**  
The Safety Company

**GM**  
General Monitors

**FIRETRACE**

**Mircom**

**tyco**

**CHEMGUARD**

**Kidde**  
Fire Systems

## SELF CONTAINED FIRE EQUIPMENT

**Commissioning large capacity fire-fighting equipment on offshore facilities has long been a major component of standard procedure. Governing codes determined by the Authority Having Jurisdiction (AHJ) can vary by circumstance and region of marine facilities.**

For land-based facilities, fire-fighting equipment requirements, policies, and procedures have remained largely fragmented. Many times, this forces facilities personnel to rely on regional fire departments in the case of a fire event, who often have to compete with logistics and proper tools in their fleet to effectively fight (what typically becomes) an advanced-stage Class B fire.

All land facility operations should place high priority in implementing the proper tools and procedures to prevent the conversion of incipient hazards to advanced-stage fires. A hazard identification (HAZID) assessment is recommended to identify areas that could compromise personnel safety and all assets of the operation.

To mitigate ignitions on hazard points for land-based facilities, the proper foam agent + delivery system for effective aspiration [designed specifically for hydrocarbons and flammable liquids (Class B) must be used.]

## GAS CYLINDER MANAGMENT

### ABS Certified

Recharge & Hydrotesting of CO2 & N2 Cylinders  
No. 23-5671691-A

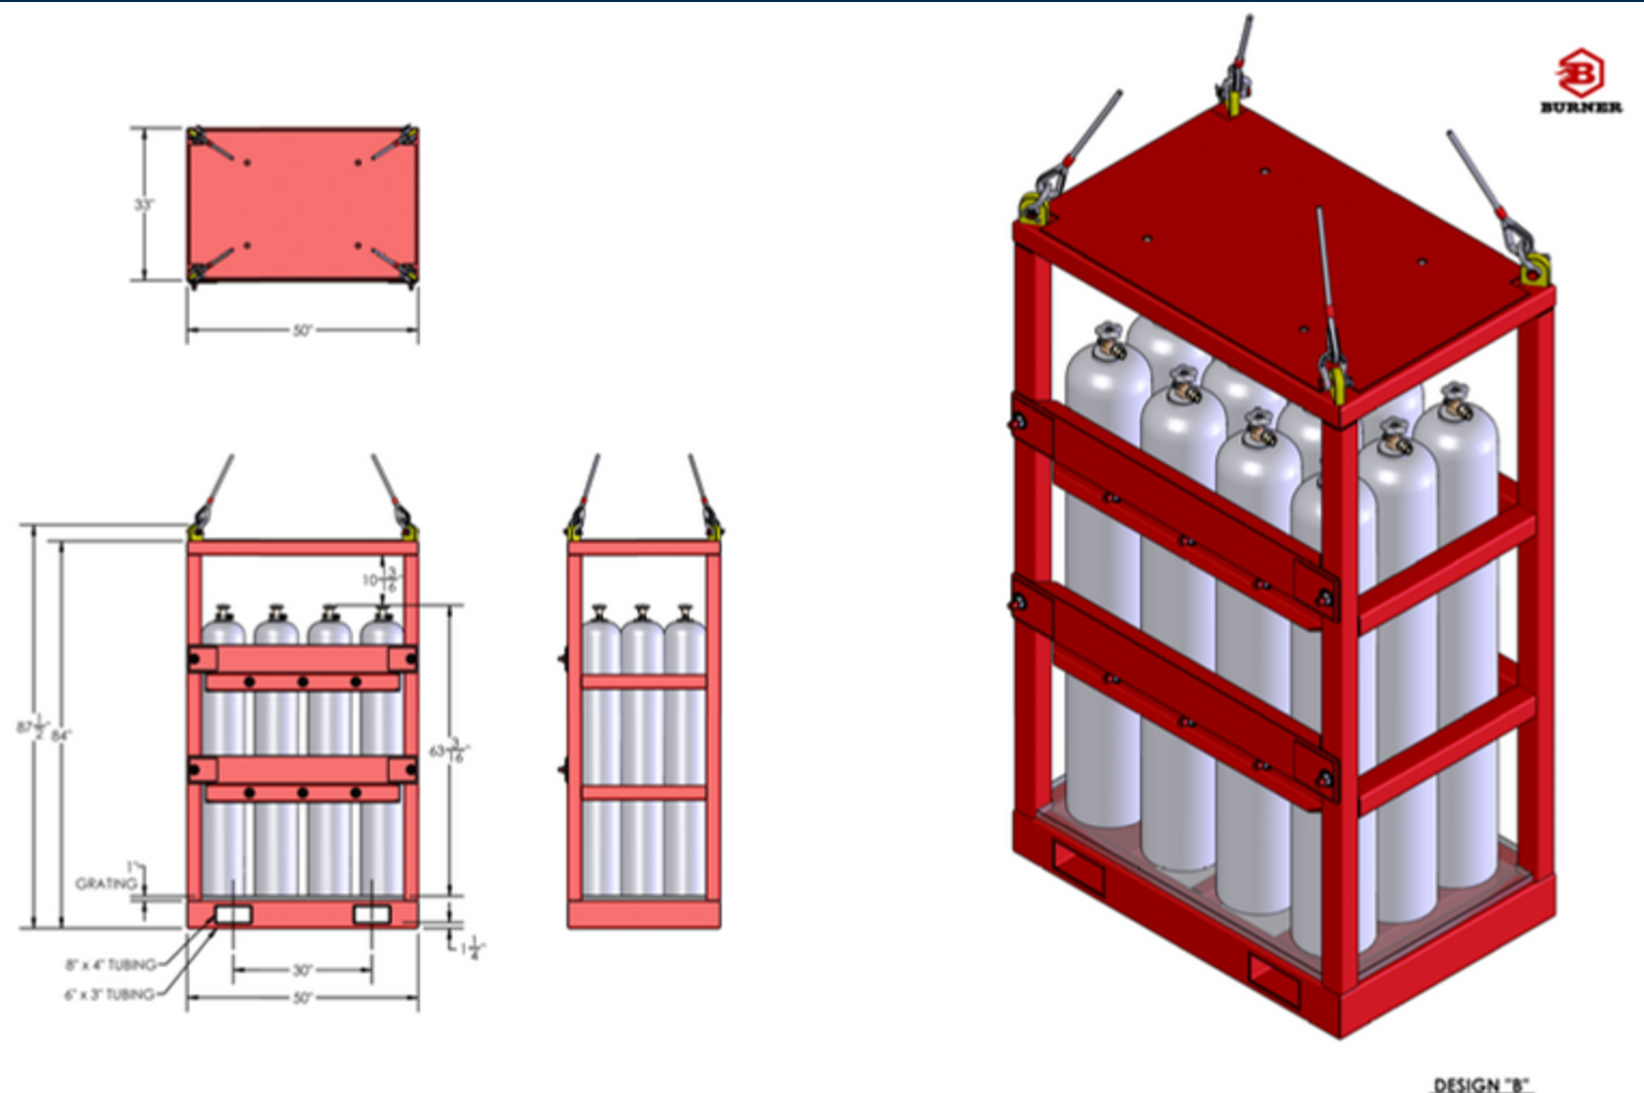

#### [Benefits]

- Full Project, Equipment, & Service Management
- Serial No.# Tracking by Cylinder & Associated Rack System
- Single Point of Contact with BURNER Key Personnel (& backup)
- Direct access to BURNER Safety Operations Team (24/7)
- Immediate response to requests & issues
- Quick turnaround on new orders & fulfillment
- Reporting timeliness & accuracy via tracking & billing systems

#### [Maintenance Procedure Cycle]

- **Retrieve**
- Complete Visual Inspection of Cylinders & Racks
- Label Verification: Labels in Place & Legible
- Cylinder Inspection: Hydro-Test Dates & Valve Condition
- Inspect, Validate, and Record Cylinder Pressures
- Function Check: Inspect & Verify All Cylinder Valves Operating Properly
- Function Check: Inspect & Verify Main Discharge Valve Operating Properly
- Inspect Lifting Sling & Rack for possible Damage
- Check & Verify Load Test Dates, Mag Test Dates
- Pressure Test Complete System; Inspect for possible Leaks
- Complete all needed repairs & **Certify for Operation**
- **Deploy**

Burner Fire Control **Gas Cylinder Management Services** have proven to provide superior value & cost savings for our customers who require diverse demands for steady streams of gas supply & deployment. Cost & inventory control are only the first phase of challenges to self-manage high volume rotating equipment (such as gas cylinders). We offer full cycle logistics, rack & cascade system setup, inspection, refill, repair, and maintenance - allowing our clients to focus on their mission-critical operations.

## INDUSTRIAL FABRICATION

### **BURNER is a premier service contractor specializing in structural & shop-based fabrication**

Our Industrial Fabrication Division performs projects at our in-house ASME coded facilities located in Broussard, LA. In keeping with the core competency of Burner's business, our fabrication facility is focused on Safety, Quality, and meeting the deliverables and expectations of our clients. BURNER's experienced and certified welders have the ability to work with varieties of materials and complete to specification and code compliant. As the manufacturer of ASME Code Vessels for our lines of our Industrial Fire Protection Systems, Burner is certified to manufacture and repair pressure vessels both in our shop and on location.

BURNER holds a "U" stamp issued by The American Society of Mechanical Engineers (ASME). In conjunction with the U stamp, we are recognized by The National Board of Boiler and Pressure Vessel Inspectors as a certified fabricator and authorized to apply the "NB" mark on boilers, pressure vessels, and other pressure-retaining equipment.

Additionally we assist our clients with their fabrication needs and the ability to design, engineer, and fabricate a wide range products including, but not limited to:

- Compressors
- Fuel Scrubbers
- Separators
- Line Heaters
- Header Manifolds
- Deck Extensions
- Service Decks
- Access Platforms
- Line Heaters
- Transport Boxes
- Boat Landings
- Heliports Landings
- Platform Ladders
- Stairwells & Handrails
- Grating
- Flow lines and Piping

## OFFSHORE SAFETY MAINTENANCE

**BURNER has deep experience in the provision of field maintenance services for the leading companies in the Gulf of Mexico and Onshore Facilities across the U.S.**

We develop and execute projects designed to maximize compliance through inspection, maintenance, upgrade, and refurbishment. Our goal is to help our clients maximize asset uptime and build a compliant safer working environment. Over 50 years, we have completed a wide variety of projects on land petrochemical, offshore production (shelf & deepwater), pipeline facilities, ships & vessels.

## INDUSTRIAL SERVICES

### Soft Craft Services

Soft Craft Services will support our current and prospective clients (regionally & internationally) as we continue to grow our industrial services group. The **Soft Craft Insulation Division** brings technology and work experience ranging from hot-to-cold, with the capabilities of **FULL DEMOLITION** of insulation & metal to **TOTAL REPLACEMENT** with the newest and most effective products on the market.

**Fabrication & Application Materials include (but not limited) to:**

- Full Range of Blankets
- Calcium Silicate
- Perlite, Foam Glass
- Pyrogel (hot) & Cryogel (cold)
- Foam Injection

The development of the service line is supported by BURNER's existing Scaffolding Division. With decades of experience in land & offshore environments, Burner is currently a Tier 1 scaffolding contractor for leading Operators in the Gulf Coast. Managing these new offerings in-house allows us to improve efficiencies, shorten completion times, and better manage safety & quality control.

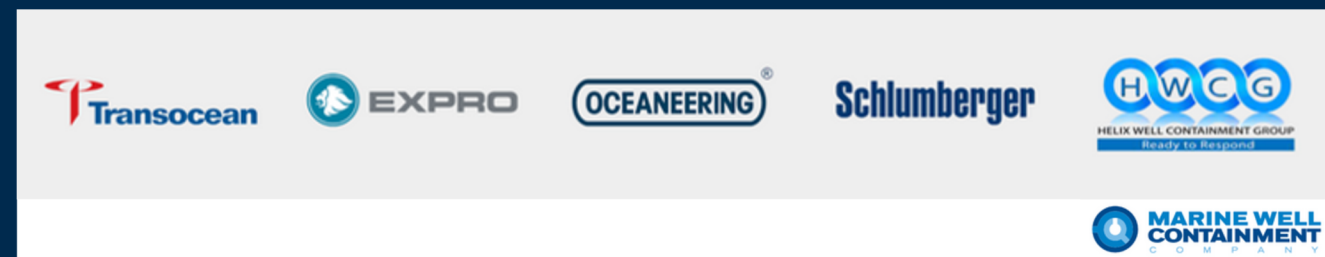

## WHO WE'VE WORKED FOR

OVER 1600 CUSTOMERS. 50 YEARS OF SERVICE.

**BURNER has built a world class team of personnel to service our clients - exceeding goals every time.**

Our focus is building premium equipment, maintaining inspection offerings to meet stringent safety standards for onshore and offshore field locations, and delivering top tier fabrication solutions and facilities maintenance services. Our deep offshore experience combined with a multiple layers of capabilities puts our company in a category its own.

Our clients represent the most successful firms in our industry and we strive to provide them with the best offshore and land services on the market.
